

ERGONOMIC LIFTING FLEXIBILITY

Our Protema range of electric trolleys offer a variety of models with a choice of lifting height, lifting capacity and applications. Our construction department adapts the standard range continuously to keep up to date with customer specifications. The lifters are type-certified by third party in accordance with the CE/Machine directive.

Unpacking at a pharmacy.

Crates in stacks are handled with a fork tool on PRO70.

ELECTRIC TROLLEY - PHARMACY

- Tool for unpacking goods in returnable plastic crates.
- Two versions:
Choose PRO70 to reach in under pallet. PRO40 has a slightly higher build.
- Super-light!:
PRO40 lifts 40 kg weighing only 20 kg.
- Strong:
Built in aluminium and stainless steel for easy handling and low-maintenance lifting aid.
- Platforms/accessories:
Foldable platform with forks underneath, adapted to suit a specific plastic crate dimension. Bracket for waste bin and pen-shelf.
- Userfriendly:
Maintenance-free battery, built-in charger that plugs into wall outlet over night.
- Safe:
Overload protection. CE-certified and manufactured in accordance with the Machine Directive.
