

# VacuEasylift VM160 stainless steel system

Project supervisor: Mike Lee, TAWI USA Inc  
Industry: Food & beverage industry  
Lifting: Paper sacks  
Used with: VM160  
Max capacity: 60 kg

This orange juice manufacturer has a stringent cleanliness requirement according to USDA (U.S. Department of Agriculture) rules.

The VacuEasylift stainless steel grade and electropolished finish were important arguments when the choice of equipment was made.

The profiles in the crane system must withstand complete washing down and the crane beam is manufactured out of square tubing to achieve this.

The suction foot used in the VM160 unit is the 10305 stainless steel version with a white skirt.
